Professional Summary

Entry-level DevOps and Cloud Engineer with hands-on experience in automating deployments and building CI/CD pipelines on AWS and Azure. Skilled in containerization, infrastructure as code, and monitoring tools to improve reliability and efficiency. Strong problem-solver with proven ability to streamline workflows and support scalable applications.

Core Competencies

- **Technical Skill:** AWS (EC2, S3, VPC, Security Groups, NAT, Route Table, RDS, Route 53, IAM, CloudWatch), Azure (VM, VMSS, AKS, Azure SQL, Storage Accounts, Resource Groups, Azure Monitor), GCP, Git, GitHub, Docker, Kubernetes, Ansible, GitHub Actions, Jenkins, CI/CD Pipelines, Terraform, Infrastructure as Code (IaC), YAML, Python, Bash/Shell Scripting, Prometheus, Grafana, Ubuntu, CentOS, Windows
- **Soft Skills:** Problem-Solving, Adaptability, Teamwork, Communication, Time Management

Professional Experience

Backend Web Developer (Cloud & AI Integration), Proctor AI (Apr' 2025 – Jun' 2025)

- Automated document-processing using Azure OCR Computer Vision API and GCP Gemini API, reducing manual effort by 60%.
- Streamlined backend workflows using Python and cloud services, cutting processing time significantly.
- Improved efficiency by building API-based automation, reducing turnaround time for clients.

Projects

End-to-End DevOps CI/CD Pipeline on Azure

- Automated Docker builds and deployments using GitHub Actions, cutting manual step time by 40%.
- Provisioned Azure Kubernetes Service (AKS) and networking with Terraform enabling environment setup in minutes.
- Integrated Prometheus and Grafana for three microservices reducing manual troubleshooting time by 50%.

Application Deployment & Monitoring on AWS

- Deployed a Next.js application on EC2 with PM2, Application Load Balancer, and Route 53, improving uptime and availability.
- Configured CloudWatch dashboards and log groups speeding up issue detection by 30%.

Scalable Web Application Deployment on AWS

- Deployed a 3-tier application using EC2 Auto Scaling, ALB, and RDS Multi-AZ, ensuring high reliability.
- Demonstrated scalability by handling increased traffic without downtime.

Education

Bachelor of Science (Honors) in Cloud Computing and Big Data

Reva University | 2022 – 2025

Certifications

Microsoft Azure Fundamentals (AZ-900)
Information Technology Specialist – Python
Microsoft Azure AI Fundamentals (AI-900)
Google Project Management Professional Certificate – Coursera
